ACCOUNT CODES OVERVIEW

Account codes are used by agencies when appointing employees to State positions. Account codes determine the retirement plan and contribution rate. For those employees eligible for CalPERS membership, the account code is used to determine retirement benefit factor, member contribution amount, and final compensation (12 or 36 month) period to which members are entitled as mandated by law.

It is very important to know the employee's membership status and appointment date when determining which account code to use. Using an incorrect account code may cause an underpayment of employer or member contributions. It is your responsibility to correctly determine which account code to use or it may result in either party owing more money to the System, and the member receiving the wrong retirement benefit.

The following charts will assist you in obtaining the employee's account code. Keep in mind that the account code charts are also located in the Personnel Action Manual (PAM). Account codes may change or be added as they are affected by legislation.

The use of **bold** within the account code chart indicates a significant change in a specific account code and the effective date of the change. The use of bullets indicates that an entire group of employees has moved to a different account code.

WHERE HAVE COVERAGE GROUPS GONE?

In the past, CalPERS assigned Coverage Group Codes to designate a specific retirement benefit package for a group of employees. Each Coverage Group Code was unique for each retirement benefit package. Employers were instructed on which Coverage Group Codes to put their employees into depending on the specific employer contract dates and/or provisions. For State and School employers, the correct Coverage Group Code depended on government code provisions and specific dates pertinent to employment history of each employee. This required knowledge on the part of the employer to determine the correct Coverage Group Code to enroll a participant into.

To alleviate the need for employers to try to select the appropriate Coverage Group Code, the new my|CalPERS system will now determine the retirement benefit package of each participant based on a combination of data elements reported by the employer. This change allows the my|CalPERS system to be more robust and flexible in meeting the demands of future contract amendments and government provisions. This will assure proper benefit payments to our future retirees and beneficiaries, with less room for error.
